

# The Role of Air and Water-Resistive Barriers in the Building Envelope

This month's program is an introduction to the air and water-resistive barriers and how they work within the building envelope. The

*Presentation will be by Dane Olson, Prosoco Regional Manager and Mr. Tom Schneider of Building Envelope Innovations LLC.*

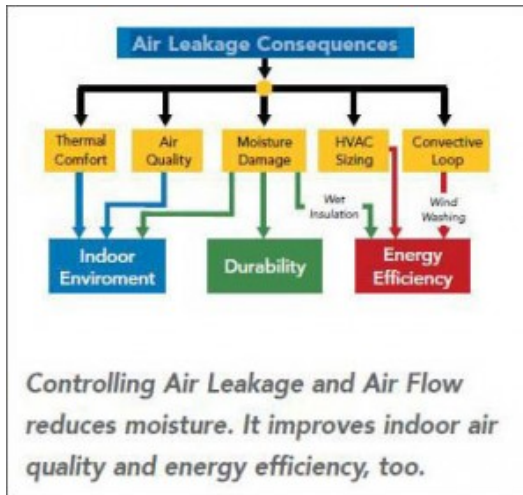

**Tuesday**

**July 19, 2011**

The Plaza Club  
900 Fort Street, 20th flr  
Parking is available in the building for \$3.50 after 5:00 p.m.

5:15 p.m.  
No Host Bar & Tabletops  
6:00 p.m.  
Buffet Dinner  
6:30 p.m.  
Program

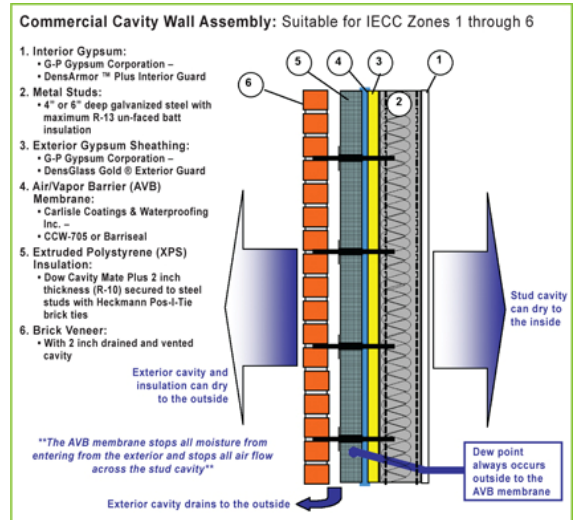

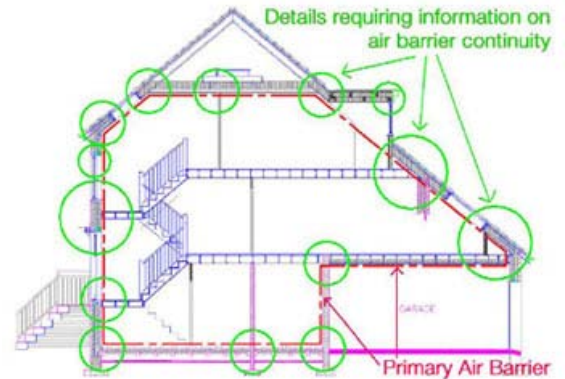

Reservations Required!  
847-1862 or fax 888-6283  
barbier@hawaiiantel.net

presentation details the role of air leakage in our buildings and how they cause mold in walls as well as having a negative impact on the building's energy cost. The program describes the various products available on the market and explains why these types of products are needed more than ever before. From this program attendees will learn about:

- Identify 9 basic points about air barriers
- Describe how air barriers work
- Compare/contrast air and vapor barriers
- Identify 4 basics of effective air barriers
- Compare/contrast 3 types of air barriers

Learning about building envelope systems is essential with the implementation of the new energy codes. Learning about air barriers is a good place to start.

This meeting qualifies for 1 HSW/SD AIA/CES learning units
